

**Proceedings of the Warsaw Conference of ECO FLOOD  
"Towards Natural Flood Reduction Strategies"  
Warsaw, 6–13 September 2003**

**Contents**

Foreword

<i>Tomasz Okruszko, Wiktor Kotowski</i> .....	3-5
1. Why we need to know more about the relationships between flood regimes and the responses of nature and natural processes <i>Maarten Platteeuw Nico Pieterse</i> .....	7-14
2. Plant communities response to floodwater conditions in Ławki Marsh in the River Biebrza Lower Basin, Poland <i>Tomasz Okruszko, Wiesław Dembek, Michał Wasilewicz</i> .....	15-21
3. Influence of macrophytes on river water levels and flood dynamics in the Upper Eider river valley a riparian wetland in Northern Germany <i>Michael Trepel, Jan Jacob Kieckbusch</i> .....	23-32
4. Recovery of alluvial meadows after an extreme summer flood: a case study <i>Petr Koutecký, Karel Prach</i> .....	33-39
5. The use of reference areas in the conservation and restoration of riverine wetlands <i>Martin Joseph Wassen</i> .....	41-49
6. Competition and succession affecting vegetation structure in riparian environments: implications for nature management <i>Wiktor Kotowski, Hubert Piórkowski</i> .....	51-57
7. Nutrient mobilisation and losses related to water conservation in peatlands <i>Andrzej Sapek, Barbara Sapek, Sławomir Chrzanowski, Marek Urbaniak</i> .....	59-65
8. Phosphorus and Nitrogen cycling in fen vegetation along different trophic conditions in the Biebrza valley, Poland <i>Mohssine El Kahloun; Marian Gerard, Patrick Meire</i> .....	67-78
9. Response of riparian vegetation to the decrease of flooding: Narwiański National Park, Poland <i>Monika Szewczyk, Wiesław Dembek, Andrzej Kamocki</i> .....	79-86
10. Could ecological flood defences be used as functional stepping-stones along migration routes of wetland birds? A theoretical approach <i>Maarten Platteeuw</i> .....	87-93
11. The impact of flooding regime on ecosystems in a tidal freshwater area <i>Aat Barendregt</i> .....	95-102
